

LUDWIG INSTITUTE FOR CANCER RESEARCH

MONOCLONAL ANTIBODY LIST

Terms and conditions for the licensing of antibodies and hybridoma cell lines or for the supply of antibodies on a sales basis are available on request. The availability of antibodies and hybridoma cell lines for supply or licensing will be assessed on a case-by-case basis. The Ludwig Institute for Cancer Research makes no guarantees that all listed antibodies and hybridoma cell lines will be available.

The Ludwig Institute for Cancer Research has prepared this catalog from information provided by the originating scientists, and it is accurate to the best of our belief. However, no representation is given as to the accuracy or completeness of any information contained herein. Nothing in this document will form part of any contract nor be regarded as a warranty or representation in relation to the products. The Ludwig Institute for Cancer Research makes no representation that any item in this catalogue is not subject to third-party intellectual property rights.

The prospective customer must determine the suitability for any purpose of the hybridoma and any antibodies produced therefrom. This document does not constitute an offer to license any hybridomas or supply any antibody. Any supply or license would be subject to the terms and conditions of a separate agreement.

This PDF contains active links to PubMed and licensed retailers. Text is searchable.

Application key

BL	Blocking
ELISA	Enzyme-linked Immuno-sorbant Assay
EM	Electron Microscopy
FACS	Flow Cytometry / Fluorescence activated Cell Sorting
IF	Immuno fluorescence
IHC	Immuno histo-chemistry
IP	Immuno precipitation
N	Neutralizing
RIA	Radio immunoassay
WB	Western Blotting
